📁 PROFESSIONAL EXPERIENCE

Software Developer, *Impinge Solutions*

04/2024 – present | Mohali

- During my role, I engaged in a broad range of projects encompassing categories such as Web Apps, System Designs, Automation and AI etc. My responsibilities varied from building projects from the ground up to maintaining existing codebases. I also conducted unit testing and managed the deployment of these projects on servers.
- Projects:**
 - Convo:** This real-time chat app enabled sending texts, videos, audio and PDFs and group chats, ensuring seamless communication and file sharing. [Demo [↗](#)]
 - TechStack:**
 - Frontend: React Js, and Bootstrap
 - Backend: Node Js, Express and Mongo DB.
 - LotteryWheel:** Developed lottery platform for registering stores, enabling QR-Scanned entries for user participation and top-three winners selection. [Demo [↗](#)]
 - Tech Stack:**
 - Frontend: React Js, Material UI, Chart.js and Bootstrap
 - Backend: FB API, QRCode, Node.js, Express and Mongo DB.
 - MicroServices:** Built two microservices: product details and user details, that streamlined data handling and boosted functionality. [Demo [↗](#)]
 - TechStack:** Java, SpringBoot, MongoDB and Docker.
 - Regenerator:** Collected questions via mobile app, generated AI answers, stored in a database. Displayed insights via charts, recommended products based on analysis.
 - TechStak:** React Js, Chart.js, OpenAI and MySQL.
 - Vintage Analysis:** Developed a feature for exporting analyzed data as CSV files and successfully upgraded the project to the latest version of Node. [Demo [↗](#)]
 - TechStack:**
 - Frontend: ReactJs and Material UI.
 - Backend: Node and MySQL.
